### EDUCATION

#### Lyceum of the Philippines University-Cavite campus, 2022

- B.S Degree in Information Technology

### SKILLS

- Web Development
- HTML - CSS - JavaScript
- Java
- Github
- Java
- WordPress
- Versatility and Adaptability
- Attention to detail
- Working under pressure
- Fast learner
- Excels in teamworking

I gained my Bachelor's Degree in Information Technology year 2022 of September. I specialized in front-end web development and intermediate in backend development. I'm currently working as a customer service representative in a healthcare insurance company to develop my communication skills and to communicate effectively with clients when I pursue my desired career in the IT industry. Working in the BPO without any prior experience and out of my comfort zone made me realize that there's nothing to be scared of trying new things as long as you learn from it. CSR helps me to develop an attention to detail, especially in healthcare industries, and to be versatile as a person which will really benefit me as an IT professional.

My goal right now is to pursue my IT career to grow and contribute to the company and learn the process as well if given the chance.
