PROFESSIONAL SUMMARY

I offer both admin support or technical help. With hands-on experience managing 400–500+ users at DHL Supply Chain and handling high-volume customer operations for a US healthcare account, I bring enterprise-level organization, system fluency, and stakeholder communication skills that go far beyond standard VA work. I set up workflows, troubleshoot tools independently, draft clear communications, coordinate across time zones, and protect confidential data.

CORE COMPETENCIES

Email & Inbox Management • Calendar & Meeting Scheduling • Administrative Coordination • Task & Project Tracking • Report Preparation & Status Updates • CRM Data Entry & Record Keeping • Vendor & Stakeholder Communication • Process Documentation & SOPs • Confidential Data Handling • Cross-functional Coordination • Google Workspace & Microsoft 365 • AI-Assisted Productivity (ChatGPT, Copilot, Gemini) • SharePoint / Power Apps • Active Directory & IT Admin Support • Canva / CapCut / Clipchamp • HTML / CSS / WordPress

EXPERIENCE

IT Specialist (DHL Supply Chain Philippines)	Aug 2025 - Feb 2026
- Served as the operational backbone for 400–500+ employees, managing 80+ daily service requests with a consistent same-day resolution rate — the same high-volume task management a VA delivers for busy executives. - Maintained a structured ticketing and documentation system in ServiceNow, ensuring every request was logged, tracked, followed up on, and closed with clear records — zero tickets lost or unresolved. - Coordinated scheduling and logistics with external vendors and contractors, managing timelines, follow-ups, and service confirmations across multiple concurrent projects. - Produced regular status reports and operational updates for stakeholders and management, translating technical detail into clear, actionable summaries. - Managed sensitive user access and account data in Active Directory with full confidentiality and zero reported data-handling incidents. - Maintained detailed asset registers and records, supporting audit readiness and eliminating discrepancies in equipment tracking. - Identified recurring workflow bottlenecks and proposed process improvements, reducing repeat requests for common issues and freeing up team capacity. - Acted as the communication bridge between technical teams and non-technical staff, drafting clear escalation messages, updates, and resolution notices.	
Customer Service Representative (Carelton Global Solutions)	March 2024 - Nov 2024
- Handled a high volume of inbound inquiries for a US-based healthcare insurance account, consistently meeting resolution quality targets with documented accuracy across HIPAA-sensitive interactions. - Used CRM systems to log, categorize, and close cases efficiently, maintaining a clean and organized case record system that supported team-wide reporting and quality audits. - Built strong written and verbal communication skills through daily client-facing work — directly applicable to managing executive inboxes, drafting professional correspondence, and handling sensitive client communications as a VA.	
Operations Assistant (Grilling and General Merchandise Family Business)	Oct 2022 - Dec 2023
- Handled end-to-end daily operations independently — scheduling, inventory tracking, supplier coordination, transaction management, and financial record-keeping — building the self-directed work ethic essential for remote VA work. - Managed customer inquiries and transactions with consistent accuracy, maintaining high satisfaction and repeat business through organized, reliable service.	
Web Developer Intern (Go Crayons)	Feb 2022 - May 2022
Remotely completed 500+ hours of structured training and contributed to live website builds using HTML, CSS, JavaScript, and WordPress — giving me a practical understanding of web tools that allows me to update websites, manage content, and troubleshoot basic issues independently as a VA.	

TECH PROFICIENCY

Productivity & Office: Microsoft Office (Word, Excel, Outlook), Google Workspace (Docs, Sheets, Slides, Drive, Calendar)
Communication: Zoom, Google Meet, Microsoft Teams, Slack
CRM & Admin Tools: ServiceNow, CRM systems, SharePoint, Power Apps
